

How to configure Adobe Acrobat (Windows/Mac) TO VALIDATE SIGNATURES

STEP 1

Open a signed document in **Adobe**

STEP 2

Select **"Signature tab"**

STEP 3

Expand signature section **"Rev 1:..."**

STEP 4

Go to **"Signature Details section"**, expand section and click on **"Certificate Details"**

STEP 5

On the left-hand side, select **"CENTRE DE CERTIFICATION DU QUÉBEC"**

STEP 6

Select tab **"Trust"**

STEP 7

In Trust Settings, click **“Add to Trusted Certificates”**

STEP 8

When prompted, click **“OK”**

STEP 9

Select option **“Use this certificate as a trusted root”** and **“Certified documents”**

STEP 10

Close and re-open **Adobe**

STEP 11

Your software is now configured to verify the validity of digital signatures issued by **Notarius**.
